

TURNSTYLE
DESIGNS

MADE IN ENGLAND

'Form follows function - that has been misunderstood. Form
and function should be as one, joined in a spiritual union.'

Frank Lloyd Wright

WHO WE ARE

Turnstyle Designs was founded by Steve Roberts in 1992. Steve and his wife Christina work collaboratively to design some of the worlds most innovative decorative hardware. We have been delivering luxury door hardware for high-end residential, commercial and yacht projects. We are proudly British made and manufactured in the beautiful Devon countryside. With multiple product combinations and flexibility to allow customisation, there is something for everyone.

Our manufacturing remains boutique and bespoke to ensure sustainability, but we are a global company with over 200 dealerships worldwide in 36 countries.

Sustainability is a part of the Turnstyle DNA. We have removed 99% of single use plastics from our packaging and replaced them with fast and completely biodegradable alternatives. Our leather is tanned with natural vegetable dyes sourced from Italy and our trademark Amalfine™ material is also made up of a composite blend of by-products. Most importantly we make our handles to last, strongly believing that if you buy well, you buy once.

As proud members of **'1% for the planet'**, we donate 1% or more of our annual turnover to environmental causes and organisations.

OUR MANUFACTURING

We produce a broad palette of products, using a wide choice of materials including hand stitched leather, machined and hammered brassware, as well as its own composite called Amalfine™. Turnstyle also use a range of custom materials including glass, shell and timber.

SOLID

Living finishes are designed to change with time and use. Our brass components are polished and then treated using a number of different processes to change the surface, either by accelerated aging as with the Vintage and Burnished finishes or brushing as with our Satin Brass.

HAMMERED

A selection of our Solid designs are available with our hammered texture applied. Every design is individually hammered with up to a thousand hammer blows per grip, each handle is made to order and completely unique. Whatever finish you wish to apply, our Hammered range is a luxurious option and versatile enough to work in any interior.

AMALFINE™

Our own proprietary composite blend of materials has been perfected over the past 28 years. Each finish is made up of its own unique blend of materials that run throughout the handle. Every piece is hand cast and hand machined before being finished in 2-3 separate processes that can take up to four hours to produce the perfect finish.

LEATHER

We have been making leather door and cabinet hardware for more than 20 years, far longer than any of our imitators. Perfecting the process, all our handles are bonded and hand stitched using only the finest full grain, vegetable tanned bridal leather.

OUR PRODUCTS

We have a wide range of products, from handles to hinges...

DOOR LEVERS

ESCUTCHEONS

COLLECTIONS complete the look...

The majority of our designs are fully suited to co-ordinate entire hardware specifications. From start to finish you can mix and match your chosen designs to fit any project.

MODIFY OUR PRODUCTS

& tailor further...

Modify

We offer modification and customisation options for clients by using existing stock components. A cost effective way to enable a client to have a unique, bespoke design by using some of Turnstyles' stocked components and modifying material, grips or finish and thereby benefiting from both price and delivery times.

Tailored

If you are not able to find something to suit your project in either of our catalogue ranges or via the Modify process we will be happy to discuss developing and manufacturing your vision from start to finish. We have the capabilities and know-how to manufacture most types of door hardware, however complex, and have been the manufacturer of choice for some of the most prestigious and demanding clients in the world, including a number of Super yacht builders.
